

E-DOCS SOLUTION OVERVIEW

DriverReach is creating a new comprehensive electronic document solution that will be a game-changer for your company. We are excited to share how we will be phasing feature roll-outs over the next several months. As always, our team strives to ensure the ultimate success of our customers, so your feedback is greatly appreciated.

We can't wait for you to implement it into your process!

PHASE 1.0 - CREATE

In 1.0, the following functionality will be available:

- Create your own electronic documents
- Use various driver and company data points as insert fields
- View 'Preview' of the document before it's sent
- Use simple text or email send capabilities
- Store the documents in an organized manner based on your preferences

PHASE 1.5 - UPLOAD

In 1.5, the following functionality will be available:

- Upload existing documents such as government forms
- Insert fields directly onto the uploaded document
- Improve the driver experience with pre-existing accounts

PHASE 2.0 - NEW UI & FIELDS; COUNTER SIGNATURES & STATUS OF DOCS

In 2.0, the following functionality will be available:

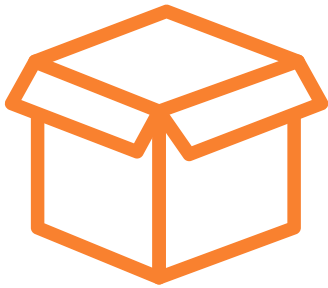

- A new interface to make creating documents even easier
- New insert fields will be available for the document:
 - Ability of users to add their signature to documents such as letters
 - Counter signatures for legal documents
 - Ability to have custom data points as insert fields
 - Free text input from recipients
 - Checkboxes when recipients need the ability to make multiple selections
 - Radio buttons when the recipient needs to make one selection
- Mobile-first driver experience improvements

PHASE 3.0 - INTERACTIONS & STORAGE; BULK ACTIONS

In 3.0, the following functionality will be available:

- Send e-docs in bulk to multiple recipients
- Hub for the driver to access all of their signed documents in their account
- Status of each document for a specific driver
- Draft documents that can be saved that are not yet ready to be deployed for use

PHASE 4.0 (FINAL) - AUTOMATION & PROMPTS

In the final phase of the release, the following functionality will be available:

- Ability for organizations to set up automation functionality, allowing users to automatically send documents based upon a driver's status or stage.
